

START PROGRAM

After a 50 year low, law enforcement fatalities have surged by 43% during the first half of 2010 according to a study by the National Law Enforcement Memorial Organization. In response to this unsettling statistic, School Violence Solutions has introduced START.

The START certification program is unlike any other tac-medicine program, as it is a program specifically designed for the law enforcement / military operator as being the end user.

With the advent of rapid mass murder attacks on malls, schools, airport, and places of business, our police and military assets are being tasked with rapidly attacking the assailants in these situations without the luxury of medics or medical personnel being there to go with them. The shooter must be stopped and any delay in reacting (like waiting for medical support to arrive) only adds to the probable loss of life.

This program does not confuse the teaching of in-depth medical procedures and practices which are otherwise not needed by front line responding law enforcement or military operators. START teaches what the individual officer or soldier needs to know if he or she is shot during high risk kinetic operations such as active killer situations, and what they can do to save themselves or the lives of their partners until medical resources can arrive on scene to provide higher levels of treatment.

START is the premier “law enforcement friendly” self aid / buddy aid course on the market today.

START instructors are veterans of not only the EMS community but also have delivered life saving treatment to themselves and others during actual firefighting and live fire actions. The instruction students receive during the 4 hour START certification program is delivered in a manner that only those who have practiced life saving medicine under fire can.

This course is a MUST for the modern day police professional who could be deployed into situations such as the active killer environment where fire department and EMS personnel just will not go into until the shooter is taken into custody or neutralized.

Instructor Bio

Joshua Chiarini (EMT)(HM2 -FMF) (USN Ret.)

His awards include the Silver Star (the nation's third highest award for valor), the Navy and Marine Corps Achievement Medal with Combat Distinguishing Device (Valor); the Combat Action Ribbon; the Navy Good Conduct Medal, the Armed Forces Expeditionary Medal and the Global War on Terrorism Expeditionary and Service Medal. Chiarini is a veteran of three combat tours in Iraq mostly assigned as a combat corpsman with USMC infantry companies in and around the Al Anbar province. Chiarini is a graduate of the military's TCCC instructor course and many other tactical medic courses'. He has also been featured on CNN's documentary "Heroes" for his life saving actions while assigned to 2nd Marine Division in Al Anbar in 2006.
