

October 5th - 8th, 2009

Leadership Development & Team Building for Law Enforcement

Presented by the Portsmouth Police Department and TEAM Associates

The Portsmouth, NH Police Department is once again proud to present "Leadership Development & Team Building for Law Enforcement," an advanced field training leadership seminar. This four-day program focuses on the functions of a leader as well as the special knowledge and skills required for effective supervision in present day law enforcement. This training is geared toward **ALL civilian members of police departments, communications officers, patrol officers, first line supervisors and managers** of any rank and position who wish to enhance their abilities as a leader. The underlying principle of *leadership at all levels* is the premise of understanding that law enforcement organizations recognize the significance of leadership development as an ongoing process of learning and developing throughout a police officer's career. This training seminar exposes the participant to the importance of personal mental and physical health and preparedness as well as a proactive approach to *Team Building* by means of classroom and experiential learning processes (ropes course) so they can apply these individual and team building strategies within their work environment.

Portsmouth Police Department first hosted this program in October 2007 with tremendous results. Participants called this seminar, "The best training I have had in my law enforcement career!" Chiefs called stating that their officers returned to their agencies pumped up, enthusiastic, and full of new ideas.

This course is presented by TEAM Associates, dedicated police officers providing professional instruction to law enforcement organizations that seek to improve services to their community by furthering the education of their employees. The TEAM Associate staff is comprised of certified law enforcement instructors who are actively teaching state and local police officers in their areas of expertise.

They are dedicated professionals with extensive backgrounds in the law enforcement community that bring a dynamic atmosphere to the classroom environment. TEAM Associates' ability to transfer curriculum from the classroom to a practical understanding for police officers working the streets is based on their unique, unconventional teaching styles, experiential based learning methods and their practical field experience.
