After registering, you will receive a confirmation email containing the Zoom link and additional information for joining the meeting.

To comply with EPA requirements covering the Pease Wastewater Treatment Facility (WWTF) NPDES Permit No. NH0109000, the City of Portsmouth Department of Public Works (DPW) has developed an updated Industrial Pretreatment Program (IPP) for approval by the Environmental Protection Agency (EPA). The draft of this program is due to be submitted to the EPA for review this June.

The IPP contains a newly revised Sewer Use Ordinance, new Local Limits addressing concentrations of pollutants acceptable at the Pease WWTF, and new permit guidance. In addition, the EPA has imposed additional sampling requirements that can result in additional laboratory fees for certain dischargers.

The City of Portsmouth DPW has scheduled a Public Information Meeting on Thursday, June 13, 2024 at 4 pm in the DPW Training Room (680 Peverly Hill Road in Portsmouth) for representatives of DPW and the City's IPP consultant Hoyle Tanner Engineering to present an overview of what you may expect from the future IPP program.

If you are attending in person, please RSVP via e-mail to wcbernan@cityofportsmouth.com to confirm your attendance. If you cannot attend in person or via Zoom and need more information, contact:
