Method: A 24-hour composite sample was taken on the date shown above. This sample was preprocessed and extracted using a solids separation, Ceres Nanoscience viral concentration, and Kingfisher extraction approach. The N1 viral marker was quantified via QIAcuity dPCR.

Results: SARS-CoV-2 N1 was detected (LOD=250 copies/100 ml) for this sample at the levels reported in Table 1.

Table 1: Sample date and biomarker results. "BDL" represents values below the quantified limits of instrument detection of 250 copies/100 mL wastewater.
